Elevating your results from Business Central_

INFINITY GROUP

Ingest data into Microsoft Fabric or Azure Data Lake for advanced analytics

- ☐ Combine BC data with CRM, HR and external sources for a 360° business view
- ☐ Enable AI and Copilot scenarios with enriched, centralised data
- ☐ Empower stakeholders to collaborate seamlessly and make informed decisions based on the latest data

Integrates with other Dynamics 365 modules for a powerful business ecosystem

- ☐ Sales: Align sales and finance with real-time access to quotes, orders and customer insights
- ☐ Customer Service: Deliver faster, more informed support with access to BC data
- ☐ Field Service: Sync inventory and job costing for efficient field operations
- ☐ Customer Insights: Run targeted campaigns using customer and purchase data from BC
- ☐ Project Operations: Manage projects end-to-end with financial control from BC
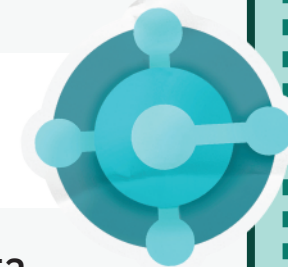

Automate, analyse and act on BC insights with Power Platform

- ☐ Power BI: Bring BC data to life with interactive dashboards and KPIs
- ☐ Power Automate: Automate approvals, notifications, and workflows across BC and other apps
- ☐ Power Apps: Build custom apps that extend BC functionality without writing code

What Business Central helps you do already:

- ☐ Streamline financials with real-time visibility and automated processes
- ☐ Optimise supply chains through inventory, purchasing, and warehouse management
- ☐ Improve project delivery with resource planning and job costing
- ☐ Enhance customer service by connecting sales and service data
- ☐ Enable remote work with a cloud-first, browser-based experience

But how can you elevate your results through integration with Business Central and other Microsoft tools?

Use AI power to streamline process and drive accuracy

- ☐ Automate repetitive tasks like invoice creation, payment reminders and data entry
- ☐ Summarise financial data and generate insights instantly
- ☐ Ask questions like "What are my top-selling items this month?" and get answers in seconds
- ☐ Leverage AI agents to proactively assist users, automate complex decision-making and provide real-time recommendations tailored to evolving business needs

Speak to our team about how you can level up your BC deployment.

Seamlessly scale BC as your business grows with Azure

- ☐ Host custom extensions, APIs and integrations in Azure
- ☐ Use Azure Logic Apps and Functions to scale BC integrations
- ☐ Migrate legacy systems into Azure for a fully cloud-native ERP ecosystem

Ensure peace of mind with Microsoft Security

- ☐ Integrate BC with Microsoft Defender for Cloud Apps for data protection
- ☐ Use Microsoft Purview for data governance and compliance
- ☐ Feed BC logs into Microsoft Sentinel for centralised threat detection

The Microsoft tech stack in action: our experience

Our own Business Central deployment is backed by integration with Dynamics 365, Microsoft 365, Copilot, Fabric and more. Find out what benefits we experienced:
